

Collaborative Software Built for Construction

Improve quality control, safety, and project management on the jobsite.

BIM 360® Build is an integrated field and project management tool that allows users to get instant project updates both in the office and in the field.

Benefits

Meeting Minute Toolset

Make meeting management effortless with clear visibility into the commitments made and a centralized location for all meeting records.

Improve Quality & Safety

Use customizable templates and checklists to track quality and streamline safety inspections.

On Time. On Budget.

Monitor and improve field performance by using historical jobsite data to drive decisions and minimize risk.

RFI & Submittal Tracking

Easily log and track RFIs and Submittals through a single platform to gain clear visibility into project status.

Capabilities

Combine mobile cloud-based collaboration technologies for onsite use of tracking and logging RFIs and Submittals as well as gaining insights into reporting to manage field processes such as quality, safety, and commissioning.

Meeting Minutes

Capture decisions made, assign individuals to action items and

Submittal Tracking

Oversee submittal logs across the entire team and easily view statuses.

Quality Control

Create and assign issues and track work with checklists.

RFI Tracking

Create RFI's and track progress using customized workflows.

Jobsite Safety Management

Encourage safety program adoption with inspection checklists and reporting.

Daily Reporting

Log daily site activity to keep track of project progress and performance.

Connect, organize & optimize your projects with BIM 360

BIM 360 Docs is the common data platform for BIM 360 and is included in three additional BIM 360 subscription offerings (Design, Coordinate, and Build).

B AUTODESK® BIM 360® DESIGN

Connect teams, enable secure real-time design collaboration, manage the exchange of design data, and easily understand design changes.

KEY CAPABILITIES:

- Revit cloud worksharing
- Access controls
- Tracking & timeline
- Coordinate deliverables
- Change visualization
- Assign issues & add markups

B AUTODESK® BIM 360® COORDINATE

Streamline VDC & BIM workflows with model coordination and automatic clash detection.

KEY CAPABILITIES:

- 3D model access & navigation
- Aggregate, filter & view models
- Create coordination spaces
- Automatic clash detection
- Clash matrix
- Model aggregation
- Issue management
- 2D & 3D compare

B AUTODESK® BIM 360® BUILD

Manage meeting minutes, the creation and resolution of RFIs & Submittals, and support proactive quality and safety management programs.

KEY CAPABILITIES:

- Meeting minutes
- RFI & submittal management
- Checklist templates
- Mobile inspections
- Issue management
- Root causes
- Daily logs
- Reporting & analytics

+ COST MANAGEMENT (add-on to BIM 360 Build)

Budget control, change order management, & pay applications.

ADDITIONAL BIM 360 PRODUCTS SOLD SEPARATELY

B AUTODESK® BIM 360® PLAN

Software to build reliable work plans using Lean Construction principles.

B AUTODESK® BIM 360® OPS

Mobile-first maintenance management solution.

For more information on subscriptions and pricing:
autodesk.com/bim-360/pricing/

B AUTODESK® BIM 360® DOCS

Securely publish and distribute construction drawings, documents, and models in a single, cloud-based repository.

KEY CAPABILITIES:

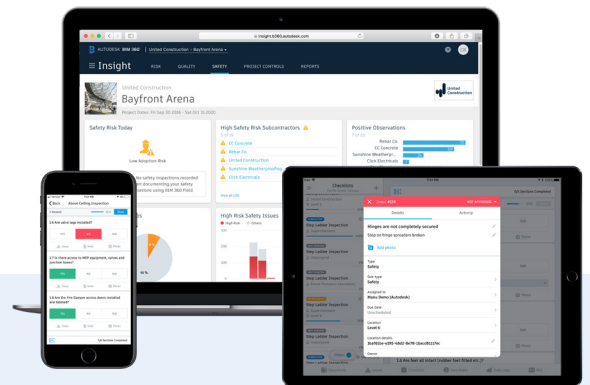

- Unlimited storage
- Document control & versioning for all file types
- Revit & AutoCAD Publishing

- 2D & 3D viewing & compare
- Document sets
- Approval workflow
- Design issues & markups
- Mobile access
- Reporting & analytics

“We surveyed our employees and 95% said they would recommend BIM 360 to other colleagues.”

JO MORTENSEN, IKT Skanska

Common Data Platform

Rather than working in siloed systems, BIM 360 integrates the entire project workflow from design through construction across one common data platform. Teams can easily transfer information from one phase to the next while housing all project information and data within a single solution.

Centralized Source of Truth

- Unified database with the most up to date information
- Eliminate multiple iterations and rework
- Deeper understanding of project data to help make informed business decisions

Easy Team Handoff

- Fast adoption from one team to the next
- Cloud based connectivity for mobile and desktop
- Accessible historical data

Improved Decision-Making

- Access to the right information at the right time
- All changes reflected in current state of published files
- Involve more stakeholders earlier on in the construction process
